

EXACT MONITOR

ALWAYS GET THE DATA

Keep products within spec and eliminate rejections with reliable, real-time concrete monitoring.

Eliminate waste and accelerate timelines with critical concrete and ambient data at your fingertips.

Reduce labour on-site with realtime data on your desktop or device.

Properly equip yourself to keep your concrete construction projects advancing in hot or cold weather.

Monitor mass concrete to stay confident you're meeting local specifications for maximum temperature and temperature differentials. This includes using PBTDL to allow for more flexibility.

Have confidence in sustainable mixes.
